Eurofins Scientific and University of New Orleans Internship/Scholarship Program

Description:
Eurofins is looking for science interns to join our teams at Central Analytics Lab (http://www.eurofinsus.com/food-testing/laboratories/eurofins-central-analytical-laboratory/) and GeneScan lab (http://www.eurofinsus.com/food-testing/laboratories/eurofins-genescan/) located in the UNO Research and Technology Park, within walking distance of campus. This is an exciting learning opportunity for young scientists and we look forward to working with the interns hired as they grow their skills in our lab. These are paid internships. Work will be conducted beginning in the summer through the end of the school year. Interns selected for the program will also receive a $1500 tuition scholarship.

Requirements:
- Applicants should be juniors or seniors in various science programs with preference given to students in Analytical Chemistry or Molecular Biology. Laboratory experience is preferable.
- Applicants must be full time students (12 credit hours).
- The paid internship extends from the summer of 2018 to the spring of 2019.

Eurofins Scientific (www.eurofins.com) is the world leader in food and pharmaceutical products testing. It is also number one in the world in the field of environmental laboratory services and one of the global market leaders in agroscience, genomics, discovery pharmacology and central laboratory services.

With over 30,000 employees in 400 laboratories across 42 countries, Eurofins offers a portfolio of over 150,000 reliable analytical methods for evaluating the safety, identity, composition, authenticity, origin and purity of biological substances and products. The Group provides its customers with high-quality services, accurate results on time and expert advice by its highly qualified staff.

Eurofins is committed to pursuing its dynamic growth strategy by expanding both its technology portfolio and its geographic reach. Through R&D and acquisitions, Eurofins draws on the latest developments in the field of biotechnology and analytical chemistry to offer its clients unique analytical solutions and the most comprehensive range of testing methods.

As one of the most innovative and quality oriented international players in its industry, Eurofins is ideally positioned to support its clients’ increasingly stringent quality and safety standards and the expanding demands of regulatory authorities around the world.

How to Apply:
Applications are due by: March 16, 2018
