

## Calculating your GPA

List your courses and how many credit hours (CH) each one is, then write the letter of your grade goal. Use the following scale to equate the grade value (GV): A = 4 B = 3 C = 2 D = 1 F = 0

To determine the quality points (QP) you'll earn, multiply  $CH \times GV = QP$  for each class. Lastly, divide total QPs by total CHs to determine what your GPA would be, based on your grade goals.

Example: 46 QPs / 13 CHs = 3.5 GPA

Course	Credit Hours	Grade Goal	Grade Value	Quality Points (CHxGV)	How do you need to prepare for your semester in order to attain your grade goal?
UNIV 1001	1	A	4	4	Submit assignments on time, attend class

**Total QP \_\_\_\_\_ / Total Credit Hours \_\_\_\_\_ = GPA \_\_\_\_\_**
