Multiobjective Engineering and Testing of ALloy Structures (METALS)

Defense Advanced Research Projects Agency (DARPA), Department of Defense (Defense), Defense Sciences Office (DSO)

Notice seeking proposals to develop foundational technologies enabling material as an explicit, continuous variable in structural design. Such foundational technologies include new material test methods to rapidly generate relevant properties and optimization frameworks that leverage materials informatics to represent complex material behavior. Proposed research should investigate innovative approaches that enable revolutionary advances.

Proposals are due June 9, 2023. Abstracts are strongly encouraged and due April 14, 2023. Multiple awards are anticipated.
